**Table Two-3: Volunteering in New York State**

Notes

- (1) Data presented for numbers of volunteers is for ages 16 and over.  
Data presented for numbers of older adult volunteers is for ages 55 and over.
- (2) Data for total hours and value of service are obviously heavily rounded estimates.  
Computing the values for certain cells from those data (e.g., hours per resident) do not equal the published data, but are within 0.5 to 2.0 percent.
- (3) The ACS 2012 One-Year Estimates, used for the State estimates, are the year closest to the 2013 volunteer data for which Census Bureau data are available.  
The ACS 2012 Five-Year Estimates must be used to obtain data for all 62 NYS counties.
- (4) Data from previous years indicate that the hours per volunteer for the ages 65 to 74 cohort is approximately 890 hours (17 hours per week).

\*\*\* By the Census Bureau, the estimate is "controlled"; therefore, "A statistical test for sampling variability is not appropriate."
